

## Move Fast – Iterate Quickly **Transform Your Business**

Dramatically reduce the time and complexity to develop, deploy, and maintain fully reactive, event-driven, real-time applications

Without VANTIQ		With VANTIQ
Multiple tools and platforms		Single platform
Large team of gurus		Small team of devs
1000s of lines of code		Low/no code
Months or years to build		Days or weeks to build
Complex, lengthy deployment		Easy, continuous deployment

Move fast, iterate, and ultimately transform your business with these sample use cases:

## Supply Chain Control

Provide real-time insight and control over a highly-distributed supply chain.

## Integrated Health Systems

Sense status of health monitoring equipment and respond appropriately in real-time.

## Environmental Monitoring + Response

Sense status of environment monitoring equipment and respond appropriately in real-time.

## Real-Time Fleet Management

Assigning appropriate vehicle to most efficiently respond to a situation.

## Dynamic Customer Service

Ensure customer service personnel are reacting to real-world events in real-time.

## Real-Time Field Service Management

Identify appropriate field service personnel, assign to task, and execute efficiently.

## Financial Services Orchestration

Integrate multiple systems-of-record to enable client services personnel to provide the best advice and take effective action in real time.

## Smart Cities

Enabling individual systems – as well as the system of systems across a smart city – to act and react in real time.

## Smart Manufacturing

Smart manufacturing systems enable dramatically improved quality levels and increased flexibility of manufacturing processes – especially those including a human component.

## Compliance, Safety, and Security

Ensures security and compliance with plans, rules, regulations, laws, and standards.

These are just a few of many possible examples - reach out to VANTIQ for more.
